System Modeling in Cellular Biology: From Concepts to Nuts and Bolts (MIT Press)

System Modeling in Cellular Biology: From Concepts to Nuts and Bolts (MIT Press)

Research in systems biology requires the collaboration of researchers from diverse backgrounds, including biology, computer science, mathematics, statistics, physics, and biochemistry. These collaborations, necessary because of the enormous breadth of background needed for research in this field, can be hindered by differing understandings of the limitations and applicability of techniques and concerns from different disciplines. This comprehensive introduction and overview of system modeling in biology makes the relevant background material from all pertinent fields accessible to researchers with different backgrounds.

The emerging area of systems level modeling in cellular biology has lacked a critical and thorough overview. This book fills that gap. It is the first to provide the necessary critical comparison of concepts and approaches, with an emphasis on their possible applications. It presents key concepts and their theoretical background, including the concepts of robustness and modularity and their exploitation to study biological systems; the best-known modeling approaches, and their advantages and disadvantages; lessons from the application of mathematical models to the study of cellular biology; and available modeling tools and datasets, along with their computational limitations.

From reader reviews:

Matthew Venegas:

This book untitled System Modeling in Cellular Biology: From Concepts to Nuts and Bolts (MIT Press) to be one of several books which best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit upon it. You will easily to buy this kind of book in the book retail outlet or you can order it via online. The publisher on this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Mobile phone. So there is no reason for your requirements to past this reserve from your list.

Stephen Hawkins:

Playing with family inside a park, coming to see the marine world or hanging out with pals is thing that usually you will have done when you have spare time, in that case why you don't try factor that really opposite from that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love System Modeling in Cellular Biology: From Concepts to Nuts and Bolts (MIT Press), it is possible to enjoy both. It is great combination right, you still need to miss it? What kind of hangout type is it? Oh can happen its mind hangout fellas. What? Still don't obtain it, oh come on its identified as reading friends.

Marie Forrest:

Your reading 6th sense will not betray you actually, why because this System Modeling in Cellular Biology: From Concepts to Nuts and Bolts (MIT Press) guide written by well-known writer we are excited for well how to make book that can be understand by anyone who read the book. Written in good manner for you, dripping every ideas and publishing skill only for eliminate your own personal hunger then you still skepticism System Modeling in Cellular Biology: From Concepts to Nuts and Bolts (MIT Press) as good book not only by the cover but also through the content. This is one reserve that can break don't assess book by its protect, so do you still needing one more sixth sense to pick this kind of!? Oh come on your reading through sixth sense already said so why you have to listening to an additional sixth sense.

Christina Harper:

As a university student exactly feel bored to reading. If their teacher questioned them to go to the library or make summary for some e-book, they are complained. Just minor students that has reading's soul or real their pastime. They just do what the educator want, like asked to the library. They go to generally there but nothing reading really. Any students feel that studying is not important, boring as well as can't see colorful images on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this System Modeling in Cellular Biology: From Concepts to Nuts and Bolts (MIT Press) can make you feel more interested to read.
