In this eye-opening book, two experts on animal communication paint a compassionate picture of the species of great apes that behaves most like us. Blending the work of other scientists with their own extensive research in orangutan behavior, Kaplan and Rogers give rare insight into the lives, and the plight, of these peaceful, intelligent creatures. They provide an amazing account of orangutan behaviors, from their remarkable mothering skills to their ways of communication. Interspersed throughout are charming tales of some of the orangutans the authors have met and befriended. The authors also discuss the uncertain fate of these gentle forest dwellers, whose jungle habitat is visibly dwindling day by day. Illustrated throughout, *The Orangutans* is the first book to focus entirely on these remarkable primates and their relationship to humans in the evolutionary tree.
