## **Binary Decision Diagrams and Extensions for System Reliability Analysis (Performability Engineering Series)** Liudong Xing, Suprasad V. Amari

Recent advances in science and technology have made modern computing and engineering systems more powerful and sophisticated than ever. The increasing complexity and scale imply that system reliability problems not only continue to be a challenge but also require more efficient models and solutions. This is the first book systematically covering the state-of-the-art binary decision diagrams and their extended models, which can provide efficient and exact solutions to reliability analysis of large and complex systems. The book provides both basic concepts and detailed algorithms for modelling and evaluating reliability of a wide range of complex systems, such as multi-state systems, phased-mission systems, fault-tolerant systems with imperfect fault coverage, systems with common-cause failures, systems with disjoint failures, and systems with functional dependent failures. These types of systems abound in safety-critical or mission-critical applications such as aerospace, circuits, power systems, medical systems, telecommunication systems, transmission systems, traffic light systems, data storage systems, and etc.

The book provides both small-scale illustrative examples and large-scale benchmark examples to demonstrate broad applications and advantages of different decision diagrams based methods for complex system reliability analysis. Other measures including component importance and failure frequency are also covered. A rich set of references is cited in the book, providing helpful resources for readers to pursue further research and study of the topics. The target audience of the book is reliability and safety engineers or researchers.

The book can serve as a textbook on system reliability analysis. It can also serve as a tutorial and reference book on decision diagrams, multi-state systems, phased-mission systems, and imperfect fault coverage models.

### **From reader reviews:**

#### **Darren Meekins:**

Do you have favorite book? In case you have, what is your favorite's book? Reserve is very important thing for us to know everything in the world. Each reserve has different aim or goal; it means that reserve has different type. Some people feel enjoy to spend their a chance to read a book. They are reading whatever they have because their hobby is usually reading a book. How about the person who don't like studying a book? Sometime, particular person feel need book whenever they found difficult problem as well as exercise. Well, probably you will require this Binary Decision Diagrams and Extensions for System Reliability Analysis (Performability Engineering Series).

#### **Harold Walsh:**

Reading a e-book can be one of a lot of task that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new data. When you read a e-book you will get new information due to the fact book is one of various ways to share the information or perhaps their idea. Second, studying a book will make you actually more imaginative. When you studying a book especially fictional book the author will bring you to definitely imagine the story how the personas do it anything. Third, you may share your knowledge to some others. When you read this Binary Decision Diagrams and Extensions for System Reliability Analysis (Performability Engineering Series), you are able to tells your family, friends and soon about yours book. Your knowledge can inspire others, make them reading a reserve.

#### **Omar Lamm:**

Playing with family in a park, coming to see the ocean world or hanging out with close friends is thing that usually you could have done when you have spare time, after that why you don't try point that really opposite from that. Just one activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Binary Decision Diagrams and Extensions for System Reliability Analysis (Performability Engineering Series), it is possible to enjoy both. It is good combination right, you still wish to miss it? What kind of hangout type is it? Oh can happen its mind hangout folks. What? Still don't have it, oh come on its identified as reading friends.

#### **Helen Noyola:**

As a pupil exactly feel bored to help reading. If their teacher expected them to go to the library or make summary for some e-book, they are complained. Just small students that has reading's internal or real their passion. They just do what the professor want, like asked to the library. They go to at this time there but nothing reading very seriously. Any students feel that looking at is not important, boring and also can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever you want. Likewise word says, many

ways to reach Chinese's country. Therefore , this Binary Decision Diagrams and Extensions for System Reliability Analysis (Performability Engineering Series) can make you experience more interested to read.
