**Electric Power System Basics for the Nonelectrical Professional (IEEE Press Series on Power Engineering)** Steven W. Blume

**The second edition of Steven W. Blume’s bestseller provides a comprehensive treatment of power technology for the non-electrical engineer working in the electric power industry**

This book aims to give non-electrical professionals a fundamental understanding of large interconnected electrical power systems, better known as the “Power Grid”, with regard to terminology, electrical concepts, design considerations, construction practices, industry standards, control room operations for both normal and emergency conditions, maintenance, consumption, telecommunications and safety. The text begins with an overview of the terminology and basic electrical concepts commonly used in the industry then it examines the generation, transmission and distribution of power. Other topics discussed include energy management, conservation of electrical energy, consumption characteristics and regulatory aspects to help readers understand modern electric power systems. This second edition features:

- New sections on renewable energy, regulatory changes, new measures to improve system reliability, and smart technologies used in the power grid system
- Updated practical examples, photographs, drawing, and illustrations to help the reader gain a better understanding of the material
- “Optional supplementary reading” sections within most chapters to elaborate on certain concepts by providing additional detail or background

*Electric Power System Basics for the Nonelectrical Professional, Second Edition*, gives business professionals in the industry and entry-level engineers a strong introduction to power technology in non-technical terms.

**Steve W. Blume** is Founder of Applied Professional Training, Inc., APT Global, LLC, APT College, LLC and APT Corporate Training Services, LLC, USA. Steve is a registered professional engineer and certified NERC Reliability Coordinator with a Master's degree in Electrical Engineering specializing in power and a Bachelor's degree specializing in Telecommunications. He has more than 25 years’ experience teaching electric power system basics to non-electrical professionals. Steve's engineering and operations experience includes generation, transmission, distribution, and electrical safety. He is an active senior member in IEEE and has published two books in power systems through IEEE and Wiley.

### **From reader reviews:**

#### **Ruth Williams:**

In this 21st century, people become competitive in every single way. By being competitive now, people have to do something to make these individuals survive, being in the middle of typically the crowded place and notice by surrounding. One thing that sometimes many people have underestimated that for a while is reading. Yeah, by reading a reserve your ability to survive increase then having chance to stand than other is high. To suit your needs who want to start reading some sort of book, we give you this Electric Power System Basics for the Nonelectrical Professional (IEEE Press Series on Power Engineering) book as starter and daily reading guide. Why, because this book is usually more than just a book.

#### **Leslie Jasso:**

The book with title Electric Power System Basics for the Nonelectrical Professional (IEEE Press Series on Power Engineering) possesses a lot of information that you can learn it. You can get a lot of profit after read this book. This kind of book exist new knowledge the information that exist in this guide represented the condition of the world now. That is important to you to know how the improvement of the world. This kind of book will bring you within new era of the global growth. You can read the e-book on the smart phone, so you can read the idea anywhere you want.

#### **Gary Lopez:**

Often the book Electric Power System Basics for the Nonelectrical Professional (IEEE Press Series on Power Engineering) has a lot details on it. So when you read this book you can get a lot of help. The book was compiled by the very famous author. The writer makes some research just before write this book. This book very easy to read you can find the point easily after looking over this book.

#### **Josefina Roundtree:**

People live in this new moment of lifestyle always try to and must have the extra time or they will get wide range of stress from both everyday life and work. So, if we ask do people have spare time, we will say absolutely of course. People is human not just a robot. Then we consult again, what kind of activity do you have when the spare time coming to anyone of course your answer can unlimited right. Then do you ever try this one, reading books. It can be your alternative inside spending your spare time, typically the book you have read is Electric Power System Basics for the Nonelectrical Professional (IEEE Press Series on Power Engineering).
