Handbook of Coherent-Domain Optical Methods: Biomedical Diagnostics, Environmental Monitoring, and Materials Science

Handbook of Coherent-Domain Optical Methods: Biomedical Diagnostics, Environmental Monitoring, and Materials Science

This Handbook provides comprehensive coverage of laser and coherent-domain methods as applied to biomedicine, environmental monitoring, and materials science. Worldwide leaders in these fields describe the fundamentals of light interaction with random media and present an overview of basic research. The latest results on coherent and polarization properties of light scattered by random media, including tissues and blood, speckles formation in multiple scattering media, and other non-destructive interactions of coherent light with rough surfaces and tissues, allow the reader to understand the principles and applications of coherent diagnostic techniques. The expanded second edition has been thoroughly updated with particular emphasis on novel coherent-domain techniques and their applications in medicine and environmental science. Volume 1 describes state-of-the-art methods of coherent and polarization optical imaging, tomography and spectroscopy; diffusion wave spectroscopy; elastic, quasi-elastic and inelastic light scattering spectroscopy and imaging; digital holographic microscopy, the Fourier transform light scattering method, and coherent diffractive imaging; wavefront sensing, aberration measurement and adaptive optics for ophthalmology; and laser remote sensing. Volume 2 presents the new and growing field of coherent optics in optical coherence tomography (OCT). Various applications of OCT and confocal microscopy, including biomedical endoscopy, are discussed. A special section covers Mueller matrix polarimetry, nonlinear laser fluorescence spectroscopy, and triplet-triplet annihilation assisted upconversion as optical tools for probing the physical parameters of materials and natural organic compounds.

From reader reviews:

Walter Crouse:

As people who live in the modest era should be update about what going on or data even knowledge to make them keep up with the era which is always change and move forward. Some of you maybe can update themselves by looking at books. It is a good choice in your case but the problems coming to anyone is you don't know which you should start with. This Handbook of Coherent-Domain Optical Methods: Biomedical Diagnostics, Environmental Monitoring, and Materials Science is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

Elvira Eberhardt:

Now a day people who Living in the era everywhere everything reachable by match the internet and the resources inside can be true or not require people to be aware of each information they get. How many people to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Examining a book can help persons out of this uncertainty Information specially this Handbook of Coherent-Domain Optical Methods: Biomedical Diagnostics, Environmental Monitoring, and Materials Science book as this book offers you rich details and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it you probably know this.

Scott Duran:

Why? Because this Handbook of Coherent-Domain Optical Methods: Biomedical Diagnostics, Environmental Monitoring, and Materials Science is an unordinary book that the inside of the publication waiting for you to snap the item but latter it will zap you with the secret the item inside. Reading this book beside it was fantastic author who all write the book in such wonderful way makes the content inside of easier to understand, entertaining way but still convey the meaning fully. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This amazing book will give you a lot of gains than the other book have got such as help improving your skill and your critical thinking method. So , still want to hold up having that book? If I ended up you I will go to the publication store hurriedly.

Billy Doyle:

Reading a book to become new life style in this year; every people loves to read a book. When you go through a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your examine, you can read education books, but if you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, as well as soon. The Handbook of Coherent-Domain Optical Methods: Biomedical Diagnostics, Environmental Monitoring, and Materials Science provide you with new experience in studying a book.
