Detective Club: Mysteries for Young Thinkers Sharon Eckert, Judy Leimbach

Looking for a fast, easy way to turn your students into advanced problem-solvers?

Young students become members of the Detective Club by solving a series of short introductory puzzles. Primary students love working along with the young detectives in the book to solve six different mysteries. While solving the mysteries, students will gather information through decoding the message, sorting information, solving logic puzzles, and using inferential thinking. In order to reach conclusions, students will practice the following skills: organizing clues, combining and analyzing the information presented, using deductive reasoning, and using the process of elimination. Each of the six mysteries includes a teacher's guide with complete instructions for the teacher and answers to the puzzles. All mysteries are presented on attractive reproducible worksheets that include entertaining dialogue and clues needed to solve the mystery. This is a motivating format for teaching thinking while working on reading comprehension.

Have your students solve even more mysteries with *Mystery Disease*, *Mystery Science*, *Crime Scene Detective*, *The Great Chocolate Caper*, and *The Loose Caboose*.

Grades 2–4
