Aristotle and Theology of Living Immortals (SUNY Series in Ancient Greek Philosophy) Richard Bodeus, Jan Garrett

Now available in English translation, this in-depth study argues that Aristotle's theology was more traditional than has been widely proposed and that Aristotle perceived the gods as living and benevolent immortals. The book includes a reconsideration of the prevailing view, the relationship between theology and science and myth and a discussion of the role of the divine in philosophy. Bodeus' arguments are supported by useful summaries and the book concludes with a comprehensive bibliography.
