Computational Musicology in Hindustani Music (Computational Music Science) Soubhik Chakraborty, Guerino Mazzola, Swarima Tewari, Moujhuri Patra

The book opens with a short introduction to Indian music, in particular classical Hindustani music, followed by a chapter on the role of statistics in computational musicology. The authors then show how to analyze musical structure using Rubato, the music software package for statistical analysis, in particular addressing modeling, melodic similarity and lengths, and entropy analysis; they then show how to analyze musical performance. Finally, they explain how the concept of seminatural composition can help a music composer to obtain the opening line of a raga-based song using Monte Carlo simulation.

The book will be of interest to musicians and musicologists, particularly those engaged with Indian music.

From reader reviews:

Wanda Matthews:

What do you with regards to book? It is not important along with you? Or just adding material when you require something to explain what your own problem? How about your time? Or are you busy individual? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Everyone has many questions above. They must answer that question simply because just their can do which. It said that about e-book. Book is familiar in each person. Yes, it is right. Because start from on kindergarten until university need this kind of Computational Musicology in Hindustani Music (Computational Music Science) to read.

Christopher Hairston:

Hey guys, do you really wants to finds a new book to read? May be the book with the subject Computational Musicology in Hindustani Music (Computational Music Science) suitable to you? The particular book was written by famous writer in this era. The particular book untitled Computational Musicology in Hindustani Music (Computational Music Science)is the one of several books in which everyone read now. That book was inspired a number of people in the world. When you read this reserve you will enter the new dimension that you ever know ahead of. The author explained their concept in the simple way, thus all of people can easily to understand the core of this publication. This book will give you a lots of information about this world now. To help you to see the represented of the world in this book.

Russell Thomas:

That publication can make you to feel relax. This specific book Computational Musicology in Hindustani Music (Computational Music Science) was colourful and of course has pictures on there. As we know that book Computational Musicology in Hindustani Music (Computational Music Science) has many kinds or type. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore not at all of book are usually make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for you and try to like reading in which.

Shane Dagostino:

As a university student exactly feel bored in order to reading. If their teacher requested them to go to the library or to make summary for some book, they are complained. Just tiny students that has reading's heart or real their interest. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading very seriously. Any students feel that examining is not important, boring and also can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Computational Musicology in Hindustani Music (Computational Music Science) can make you really feel more interested to read.
