Feminist Perspectives on Sociology Barbara Littlewood

The Feminist Perspectives Series seeks to provide concise, accessible and engaging introductions to key feminist topics and debates. The texts in the series are designed to be used on a wide range of courses touching feminist issues and are written by experienced teachers who are also well known in their respective fields. Each book in the series includes the most up-to-date statistics, research data, key sources and suggestions for further reading.

Feminist Perspectives on Sociology examines how sociology has been transformed under the influence of feminism in recent years. This transformation consists both of a critique of established areas and the opening up of new ones. Areas and issues covered include approaches to knowledge and research, patriarchal relations, work in and outside the home, body politics, sport and fitness, migration, violence, the state, and globalisation. The book also reviews a range of 'post' perspectives and arguments including postmodernism, postcolonialism and postfeminism. Feminism is also a transformative social movement. Its political impact, from local to transnational levels, has to be taken into account in assessing developments in sociology, providing it with a connection between research and action.
