## **Kick the Fossil Fuel Habit: 10 Clean Technologies to Save Our World** Tom Rand

In *Kick the Fossil Fuel Habit*, author Tom Rand, (engineer, Cleantech authority, venture capitalist, pragmatic entrepreneur and philosopher) doesn't provide a "three-easy-steps" approach to fixing our dependence on fossil fuels. But he does show it's possible to do without them.

By giving an in-depth look at ten technologies that together can bring a clean future, free of fossil fuels, Tom provides education and hope. This is a clarion call, a directive that we act quickly and collectively (governments, corporations and individuals) to provide future generations the opportunity to live in a sustainable world.

Unique in being accessible to the general public, his message is not just important, but understandable and entertaining. His personal views and anecdotes are combined with a hardheaded engineering and business perspective. Beautiful color photographs bring the text to life. It is this generation's job to save the world we know for the next. *Kick the Fossil Fuel Habit* shows us how.
