Performance Analysis of Communications Networks and Systems

Piet Van Mieghem

Performance Analysis of Communications Networks and Systems Piet Van Mieghem

This rigorous and self-contained book describes mathematical and, in particular, stochastic methods to assess the performance of networked systems. It consists of three parts. Part one is a review of probability theory. Part two covers the classical theory of stochastic processes (Poisson, renewal, Markov, and queuing theory), which are considered to be the basic building blocks for performance evaluation studies. Part three focuses on the relatively new field of the physics of networks. This part deals with the recently obtained insights that many very different large complex networks - such as the Internet, World Wide Web, proteins, utility infrastructures, social networks - evolve and behave according to more general common scaling laws. This understanding is useful when assessing the end-to-end quality of communications services, for example, in Internet telephony, real-time video, and interacting games. Containing problems and solutions, this book is ideal for graduate students taking courses in performance analysis.

From reader reviews:

Jonathan Flannagan:

Do you have favorite book? For those who have, what is your favorite's book? Reserve is very important thing for us to find out everything in the world. Each publication has different aim or maybe goal; it means that publication has different type. Some people really feel enjoy to spend their time and energy to read a book. They may be reading whatever they take because their hobby is reading a book. Think about the person who don't like examining a book? Sometime, individual feel need book after they found difficult problem or maybe exercise. Well, probably you will need this Performance Analysis of Communications Networks and Systems.

Alice Wilkerson:

What do you think about book? It is just for students because they are still students or this for all people in the world, the actual best subject for that? Merely you can be answered for that problem above. Every person has diverse personality and hobby for every other. Don't to be pushed someone or something that they don't desire do that. You must know how great in addition to important the book Performance Analysis of Communications Networks and Systems. All type of book is it possible to see on many solutions. You can look for the internet solutions or other social media.

Danielle Rucks:

Do you one among people who can't read satisfying if the sentence chained from the straightway, hold on guys this kind of aren't like that. This Performance Analysis of Communications Networks and Systems book is readable simply by you who hate the straight word style. You will find the facts here are arrange for enjoyable reading experience without leaving possibly decrease the knowledge that want to give to you. The writer involving Performance Analysis of Communications Networks and Systems content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the content but it just different in the form of it. So , do you even now thinking Performance Analysis of Communications Networks and Systems is not loveable to be your top record reading book?

Jessica Duncan:

Beside this particular Performance Analysis of Communications Networks and Systems in your phone, it could possibly give you a way to get closer to the new knowledge or information. The information and the knowledge you can got here is fresh from oven so don't become worry if you feel like an old people live in narrow commune. It is good thing to have Performance Analysis of Communications Networks and Systems because this book offers to you personally readable information. Do you often have book but you seldom get what it's exactly about. Oh come on, that wil happen if you have this in your hand. The Enjoyable arrangement here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss this? Find this book as well as read it from right now!
