Science and Method

Henri Poincar

Science and Method Henri Poincar

"Henri Poincaré's *Science and Method* is an examination of the process scientists go through when determining which of the countless facts before them will be most useful in advancing scientific knowledge. In this highly readable text, first published in 1908 and here presented in a 1914 translation, Poincaré investigates mathematics, logic, physics, mechanics, and astronomy and discusses how the methods of selection differ with each field. Topics discussed include: the selection of facts, the future of mathematics, chance, the relativity of space, mathematics and logic, mechanics and radium, mechanics and optics, the new mechanics and astronomy, the Milky Way and the theory of gases, and much more. French theoretical physicist, philosopher of science, and mathematician HENRI POINCARÉ (1854-1912) also wrote *New Methods of Celestial Mechanics* (1892-99) and *Lessons of Celestial Mechanics*. (1905-10)."
