The Scientific Nature of Geomorphology: Proceedings of the 27th Binghamton Symposium in Geomorphology, Held 27-29 September, 1996 Bruce L. Rhoads, Colin E. Thorn

Geomorphology is a discipline which has traditionally been dominated by fieldwork. This volume is devoted to the philosophical and methodological components of the discipline. Its purpose is to provide a comprehensive examination of contemporary perspectives on the scientific nature of geomorphology. The book should help unify and strengthen the disciplines by clarifying how geomorphology fits into the realm of the sciences, by examining its relationship to other sciences, by providing an improved understanding of methodological diversity in the discipline, and by identifying potential bases for disciplinary unity.
