**Phenomenology of Unification from Present to Future: 23-26 March, 1994 Roma** G. Diambrini-Palazzi, C. Cosmelli

These conference proceedings review the results obtained so far and the perspectives in the foreseeable future concerning unification of the forces and laws of nature. One of its important features was the emphasis on phenomenological implications of the different theoretical approaches reviewed by invited speakers, keeping in view possible experimental tests to be made with the technologies now available or to be developed in the future. The first part of the proceedings covers unification problems connected with the electroweak theory and the standard model, the so-called "grand" unification and the supersymmetry. The surveys of the experimental data available are of data from LEP accelerator experiments, the physics at LHC (Large Hadron Collider), as well as CP violation, neutrino oscillations, and proton decay. Following these are surveys of the perspectives of future high energy accelerators, like the LHC at CERN, the electron-positron colliders, and the possible new acceleration methods. The second part of the proceedings concerns the more advanced problems of the unification of gravity with the other forces of string theory and quantum gravity, with the interesting phenomenological implications concerning cosmology and quantum mechanics. The implied phenomenology is presented and discussed at two fundamental levels: testing the quantum mechanics at a macroscopic level, with special measurements of superconducting quantum states, and possible detection of classical and quantum features of gravitational radiation, not only from astrophysical sources but also from possible laboratory sources. Finally, the perspectives of fundamental physics are discussed.

**From reader reviews:**

**Samuel Lester:**

What do you think of book? It is just for students because they are still students or it for all people in the world, the actual best subject for that? Simply you can be answered for that question above. Every person has different personality and hobby for every single other. Don't to be forced someone or something that they don't need do that. You must know how great and important the book Phenomenology of Unification from Present to Future: 23-26 March, 1994 Roma. All type of book could you see on many sources. You can look for the internet options or other social media.

**Chuck Deschenes:**

Spent a free the perfect time to be fun activity to complete! A lot of people spent their free time with their family, or all their friends. Usually they accomplishing activity like watching television, going to beach, or picnic within the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Could be reading a book may be option to fill your totally free time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to try look for book, may be the e-book untitled Phenomenology of Unification from Present to Future: 23-26 March, 1994 Roma can be very good book to read. May be it can be best activity to you.

**Harrison Colon:**

This Phenomenology of Unification from Present to Future: 23-26 March, 1994 Roma is new way for you who has curiosity to look for some information given it relief your hunger associated with. Getting deeper you upon it getting knowledge more you know or you who still having small amount of digest in reading this Phenomenology of Unification from Present to Future: 23-26 March, 1994 Roma can be the light food for you personally because the information inside this particular book is easy to get through anyone. These books develop itself in the form that is certainly reachable by anyone, yep I mean in the e-book application form. People who think that in book form make them feel sleepy even dizzy this publication is the answer. So there isn't any in reading a e-book especially this one. You can find actually looking for. It should be here for anyone. So , don't miss this! Just read this e-book type for your better life and also knowledge.

**John Moreno:**

As a university student exactly feel bored to reading. If their teacher asked them to go to the library in order to make summary for some book, they are complained. Just small students that has reading's heart and soul or real their interest. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that examining is not important, boring as well as can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Phenomenology of Unification from Present to Future: 23-26 March, 1994 Roma

can make you feel more interested to read.
