How Is Paper Made? (Everyday Mysteries) Demi Jackson

The ancient Chinese began making paper about 2,000 years ago. The basic process they created has been used throughout history. However, paper companies today use machines and can make a lot of paper at once instead of just one sheet at a time. Readers track papermaking from cutting down trees and making pulp with the wood to the final product we can use for writing. Full-color photographs show the papermaking process step by step, and an illustrated diagram simplifies it further for readers to review after reading the main content.
