Excerpt from How to Paint: Directions for Applying Paint and Varnish With Best Results

This should be done with a putty knife, as puttying with the fingers does not fill the holes well.

Second coat. From four to six days should be allowed for first coat to dry. The paint for second coat requires no thinning and should be applied as you receive it, that is in its natural thickness. Occasionally when the bottom of the can or kit 'is reached the paint is found to be very thick, this is caused by its not being properly stirred at the beginning of the painting. In such cases add sufficient boiled linseed oil to bring it to the consistency so it will again work easily under the brush. For inside work, where our inside white is used, thin with turpentine if required.
