Architect's Drawing Kit: Draw Your Home in 3-D Daniel K. Reif

Architects and engineers use perspective drawing to help design and visualize their projects. The "Architect's Drawing Kit" shows you how perspective drawing is used to sketch realistic-looking interior and exterior house designs. The kit includes twelve perspective drawing charts and tracing paper, as well as instructions and sample illustrations. You trace the sample illustrations to learn how the charts work and can then use the charts to draw your own projects. For an architect, engineer, designer, decorator and artist, drawing is thinking. The kit works well with the Home Quick Planner and 3-D Home Kit (sold separately). Use the Architect's Drawing Kit to sketch your own real or dream house decorating, remodeling or building project. Then use the Home Quick Planner to design the floor plan and furniture layout. Once you have a design that you like, use the 3-D Home Kit to construct a detailed 1/4-inch scale model of your design.
