Control and Optimization of Distributed Generation Systems (Power Systems)

Magdi S. Mahmoud, Fouad M. AL-Sunni

Control and Optimization of Distributed Generation Systems (Power Systems) Magdi S. Mahmoud, Fouad M. AL-Sunni

This text is an introduction to the use of control in distributed power generation. It shows the reader how reliable control can be achieved so as to realize the potential of small networks of diverse energy sources, either singly or in coordination, for meeting concerns of energy cost, energy security and environmental protection.

The book demonstrates how such microgrids, interconnecting groups of generating units and loads within a local area, can be an effective means of balancing electrical supply and demand. It takes advantage of the ability to connect and disconnect microgrids from the main body of the power grid to give flexibility in response to special events, planned or unplanned.

In order to capture the main opportunities for expanding the power grid and to present the plethora of associated open problems in control theory *Control and Optimization of Distributed Generation Systems* is organized to treat three key themes, namely:

- system architecture and integration;
- modelling and analysis; and
- communications and control.

Each chapter makes use of examples and simulations and appropriate problems to help the reader study. Tools helpful to the reader in accessing the mathematical analysis presented within the main body of the book are given in an appendix.

Control and Optimization of Distributed Generation Systems will enable readers new to the field of distributed power generation and networked control, whether experienced academic migrating from another field or graduate student beginning a research career, to familiarize themselves with the important points of the control and regulation of microgrids. It will also be useful for practising power engineers wishing to keep abreast of changes in power grids necessitated by the diversification of generating methods.

From reader reviews:

Billy Simpson:

This Control and Optimization of Distributed Generation Systems (Power Systems) usually are reliable for you who want to be considered a successful person, why. The key reason why of this Control and Optimization of Distributed Generation Systems (Power Systems) can be one of several great books you must have is giving you more than just simple looking at food but feed anyone with information that might be will shock your earlier knowledge. This book will be handy, you can bring it just about everywhere and whenever your conditions at e-book and printed types. Beside that this Control and Optimization of Distributed Generation Systems (Power Systems) giving you an enormous of experience including rich vocabulary, giving you trial run of critical thinking that we realize it useful in your day action. So , let's have it and luxuriate in reading.

Deborah Oneal:

The book with title Control and Optimization of Distributed Generation Systems (Power Systems) possesses a lot of information that you can learn it. You can get a lot of benefit after read this book. This particular book exist new knowledge the information that exist in this guide represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This book will bring you inside new era of the internationalization. You can read the e-book with your smart phone, so you can read it anywhere you want.

Patricia Sax:

You can spend your free time you just read this book this reserve. This Control and Optimization of Distributed Generation Systems (Power Systems) is simple to bring you can read it in the playground, in the beach, train as well as soon. If you did not possess much space to bring the actual printed book, you can buy often the e-book. It is make you much easier to read it. You can save the actual book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

Ernestine Pagan:

Many people spending their moment by playing outside having friends, fun activity along with family or just watching TV the entire day. You can have new activity to pay your whole day by examining a book. Ugh, do you think reading a book can definitely hard because you have to bring the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Mobile phone. Like Control and Optimization of Distributed Generation Systems (Power Systems) which is having the e-book version. So , why not try out this book? Let's observe.
