## **Electrochemistry at Semiconductor and Oxidized Metal Electrodes S.R. Morrison**

The objective of the present volume is to develop the theory and practice of nonmetal electrochemistry from first principles, emphasizing energy level models, in particular the fluctuating energy level model of Marcus and Gerischer. A single volume emphasizing these models, and the interpretation of experiments based on these models, has not been available. Yet this area of electrochemical technology, where the use of such models is required, has developed a great deal of interest. This is not only because of the interest in photoelectrochemical solar cells, but also because of the importance of the concepts in corrosion, sensors, coated metal electrodes, and, indeed, to the general theory of electrode reactions. This book is an attempt to fill the void-to develop in a single volume the basic description of electrode reactions on nonmetallic electrodes and oxide-covered metal electrodes. The development of the fluctuating energy level model to describe electrode reactions on nonmetals (as described in Chapters I through 3) has permitted a significant forward step in the understanding of such reactions. The power of the model is illustrated by the simple methods available to determine the energy levels of interest-the conduction and valence bands of the nonmetals (Chapter 5), and their relation to the energy levels of oxidizing or reducing agents in solution. In Chapter 6, we illustrate the ability of the simple models, based on these parameters, to describe successfully electrode reactions at an inert electrode.

### **From reader reviews:**

#### **Judy Chisolm:**

Have you spare time for a day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a wander, shopping, or went to the Mall. How about open or read a book entitled Electrochemistry at Semiconductor and Oxidized Metal Electrodes? Maybe it is being best activity for you. You realize beside you can spend your time together with your favorite's book, you can better than before. Do you agree with their opinion or you have additional opinion?

#### **Edgar Foley:**

Book will be written, printed, or descriptive for everything. You can know everything you want by a reserve. Book has a different type. As it is known to us that book is important issue to bring us around the world. Adjacent to that you can your reading expertise was fluently. A guide Electrochemistry at Semiconductor and Oxidized Metal Electrodes will make you to be smarter. You can feel considerably more confidence if you can know about anything. But some of you think that open or reading any book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you looking for best book or suitable book with you?

#### **Cathie Moss:**

Do you have something that that suits you such as book? The book lovers usually prefer to opt for book like comic, limited story and the biggest one is novel. Now, why not seeking Electrochemistry at Semiconductor and Oxidized Metal Electrodes that give your entertainment preference will be satisfied through reading this book. Reading behavior all over the world can be said as the means for people to know world a great deal better then how they react towards the world. It can't be claimed constantly that reading habit only for the geeky man but for all of you who wants to become success person. So , for all you who want to start studying as your good habit, you are able to pick Electrochemistry at Semiconductor and Oxidized Metal Electrodes become your own personal starter.

#### **Herman Jenkins:**

Are you kind of occupied person, only have 10 or 15 minute in your time to upgrading your mind skill or thinking skill also analytical thinking? Then you are having problem with the book compared to can satisfy your short time to read it because all of this time you only find guide that need more time to be go through. Electrochemistry at Semiconductor and Oxidized Metal Electrodes can be your answer mainly because it can be read by an individual who have those short extra time problems.
