**Linux User's Guide: Using the Command Line & Gnome with Red Hat Linux 9.0** Carolyn Z. Gillay

This book is designed to be a tutorial with an extensive hands-on practice to tie the practical with the theoretical. Concrete examples promote understanding of universal operating system concepts. The advanced material covers elementary shell scripting and customizing the desktop environment.

This is an enduser's guide--activities and exercises are performed at the root access level, but the tools to manage a Linux workstation are covered. The focus is on the knowledge necessary to move to the next level, basic system administration. Thus, after working carefully through the material in this book, the how and why of the enduser functions of the Linux operating system becomes clear. Further, the book's approach encourages the understanding that the primary function of Linux, as of any operating system, is the management of the entire computer system (hardware, software, and files).

Each section of the book is presented in a careful, step-by-step style. Numerous screen shots show the expected results of each step. This not only minimizes the need for assistance in a laboratory setting, but also eases the difficulties of those working on their own computers at home or work. Interspersed between the steps in the exercises are the reasons for and the results of each action. A students activities disk is bundled with the book. This disk, labeled BOOK, contains the files that are needed to successfully complete the step-by-step activities in each chapter.

Each chapter includes a chapter overview, learning objectives, learning outcomes, commands introduced, a list of key terms, a chapter summary, discussion questions, true-and-false questions, completion questions, multiple-choice questions, and problems to promote mastery.

#### **Aaron Tolleson:**

Is it a person who having spare time subsequently spend it whole day by watching television programs or just lying on the bed? Do you need something totally new? This Linux User's Guide: Using the Command Line & Gnome with Red Hat Linux 9.0 can be the respond to, oh how comes? The new book you know. You are thus out of date, spending your extra time by reading in this fresh era is common not a geek activity. So what these publications have than the others?

#### **Sena Meyer:**

As a pupil exactly feel bored in order to reading. If their teacher requested them to go to the library as well as to make summary for some book, they are complained. Just minor students that has reading's spirit or real their hobby. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading very seriously. Any students feel that looking at is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Linux User's Guide: Using the Command Line & Gnome with Red Hat Linux 9.0 can make you truly feel more interested to read.
