Child Poverty in America Today: Health and Medical Care, Volume 2

Child Poverty in America Today: Health and Medical Care, Volume 2

Every 40 seconds in the United States a child is born into poverty. Here is hope for the future. A 2004 study by the Annie E. Casey, Ford, and Rockefeller Foundations found that low-income and poor families account for one-third of all of the children in American working families. Families at or below the poverty line live a precarious existence, often faring poorly in their struggle to provide for themselves - and their children. This four-volume set reveals, explicates, analyzes and assesses the effects of an inadequate income on children. Each volume contains original essays written by an interdisciplinary roster of contributors. Volume 2, HEALTH AND MEDICAL CARE, includes discussions on the status of Medicaid, the lack of mental health services available for low-income families, and the difficult-to-access healthcare for the rural poor.
