**Psychiatric Interview of Children and Adolescents** Dr Claudio Cepeda, Lucille Gotanco

Eliciting useful information from young patients and their families is both a skill and an art, and *Psychiatric Interview of Children and Adolescents*, an exceptionally practical and comprehensive guide, enables mental health clinicians and trainees to first improve their interviewing skills and then organize and integrate the information derived from the interview to construct an effective treatment program. This book, building on the success of its predecessor, *Clinical Manual of Psychiatric Interview of Children and Adolescents*, offers updated and revised material, as well as expanded coverage that includes new findings and addresses emerging issues in the field. For example, a new chapter focusing on the psychiatric evaluation of preschoolers and very young children has been added, and the section on bullying in the chapter on abuse has been expanded to include cyber bullying. Clinical vignettes illustrate important concepts and techniques, providing a real-world component that readers will find both fascinating and instructive, and the key points at the end of each chapter and numerous quick-reference tables facilitate consolidation of learning.

Easy to read, yet rigorous in its clinical focus, *Psychiatric Interview of Children and Adolescents* provides a solid foundation and expert guidance for clinicians evaluating and treating this critically important population.
