Resource Spillover from Academia to High-tech Industry: Evidence from New Nanotechnology-Based Firms in the U.S. Jue Wang

The role of universities in supporting economic development has been explored in studies emphasizing the mechanisms of technology transfer and knowledge spillover. However, in addition to intellectual capital, university scientists bring other resources into research collaboration and contribute to firm partnerships in both direct and indirect ways. This book develops the concept of resource spillover, which captures the various ways in which firms can benefit from collaborations with university scientists. The study categorizes the resources possessed by university scientists into intellectual capital, social capital, and positional capital, and tests the impact of each on the performance of firms. Using a sample of new nanotechnology-based firms in the United States, the study finds that firms benefit from research collaboration in terms of both increased research capability and research output and improved public relations and research credibility. The work contributes to the university-industry technology transfer literature and is useful to managers and policy scientists who are developing research partnership programs or intermediary organizations.

From reader reviews:

Teresa Hennessey:

This Resource Spillover from Academia to High-tech Industry: Evidence from New Nanotechnology-Based Firms in the U.S. usually are reliable for you who want to be a successful person, why. The key reason why of this Resource Spillover from Academia to High-tech Industry: Evidence from New Nanotechnology-Based Firms in the U.S. can be among the great books you must have is giving you more than just simple studying food but feed you actually with information that might be will shock your prior knowledge. This book is handy, you can bring it all over the place and whenever your conditions both in e-book and printed people. Beside that this Resource Spillover from Academia to High-tech Industry: Evidence from New Nanotechnology-Based Firms in the U.S. giving you an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that we know it useful in your day activity. So , let's have it and luxuriate in reading.

Nancy Hartsell:

The e-book untitled Resource Spillover from Academia to High-tech Industry: Evidence from New Nanotechnology-Based Firms in the U.S. is the book that recommended to you to learn. You can see the quality of the e-book content that will be shown to you. The language that creator use to explained their way of doing something is easily to understand. The copy writer was did a lot of investigation when write the book, therefore the information that they share for your requirements is absolutely accurate. You also might get the e-book of Resource Spillover from Academia to High-tech Industry: Evidence from New Nanotechnology-Based Firms in the U.S. from the publisher to make you a lot more enjoy free time.

Martha Howell:

Don't be worry if you are afraid that this book may filled the space in your house, you could have it in e-book means, more simple and reachable. This kind of Resource Spillover from Academia to High-tech Industry: Evidence from New Nanotechnology-Based Firms in the U.S. can give you a lot of friends because by you investigating this one book you have thing that they don't and make you actually more like an interesting person. This kind of book can be one of one step for you to get success. This guide offer you information that maybe your friend doesn't understand, by knowing more than different make you to be great persons. So , why hesitate? Let's have Resource Spillover from Academia to High-tech Industry: Evidence from New Nanotechnology-Based Firms in the U.S..

Ana May:

You will get this Resource Spillover from Academia to High-tech Industry: Evidence from New Nanotechnology-Based Firms in the U.S. by browse the bookstore or Mall. Just simply viewing or reviewing it may to be your solve challenge if you get difficulties for ones knowledge. Kinds of this e-book are various. Not only by means of written or printed and also can you enjoy this book by means of e-book. In the modern

era similar to now, you just looking by your local mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose suitable ways for you.
